DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because the use of the term "can be" renders the metes and bounds of the claim indeterminable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al.

Suzuki et al. discloses a projector comprising:

a projection lens (30);

an air outlet (12) and fan (17);

Art Unit: 2851

a lens cover (30B);

The lens cover "can be" held in my hands at any position or angle I desire, such as between the outlet and the lens and at angle. I may also turn the cover about any axis I want. No further structure is necessitated by the claim language.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Konnuma et al. in view of Suzuki et al.

Konnuma et al. disclose a projector in which a projection lens and an air outlet are located on a same front of the housing.

It would have been obvious to one skilled in the art to utilize a lens cover as taught by Suzuki in other projectors in order to protect the lens when not in use. Such a lens cover "can be" moved as desired as described above.

Allowable Subject Matter

7. Claims 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
